Helping you manage operating costs and minimize downtime with Planned Maintenance and major Component Rebuild.

FULL-EQUIPMENT REPAIR SHOP

Customized Preventive Maintenance

No heavy equipment repair is too big, and no repair job is too small for our in-shop and field service!

Product Support

- We are a Komatsu mining equipment distributor.
- Sales and rentals, plus Parts and Service.
- We have 68 years of mining and construction equipment shop and field service repair experience.
- Over the years, a wide range of heavy equipment brands and models have had a complete second life from rebuilds performed by our techs in this facility and field, working closely with our remanufacturing shops for component rebuilds, give us a distinct advantage in price and turn times.

Shop Service

- Our service shops are continually updated with the latest diagnostics and tooling to perform inspections, maintenance items, warranty work, major repair, and under-carriage refurbishment.
- Indoor and outdoor concrete bays for projects requiring additional workspace and forklift accessibility.

Field Service

- Our field service operates a fleet of fully outfitted service trucks with the latest testing and diagnostic equipment.
- Fully equipped full-service preventive maintenance lube truck.
- Our field machining services is an extension of the service shop with an arsenal of portable machining tools, including drills, up to 24" boring equipment, flange facing equipment, precision grinders, full welding capability, and much more construction equipment offers 24 hr. callout parts and service availability.

COMPLETE HYDRAULIC SERVICES

Fast, Reliable, with the Highest Quality

If it's hydraulic, we can get the parts, service, repair, or rebuild it! Components are rebuilt to OEM spec on any brand and any model. Savings of up to 60% over buying new.

Cylinders and Suspensions

- Repair damaged surfaces to OEM specifications.
- Replate, weld repair, and retube as required.
- Test under operating conditions throughout the entire stroke on special test equipment engineered and built by Core Machinery.
- Static suspensions test.

Hydraulic Pumps, Motors, Valves

- Repair or rebuild any brand, any model.
- Totally enclosed, dust-free, temperature controlled clean room.
- Testing assures the performance of rebuilt/repairs components to meet OEM standards.

Chrome Plating

- We minimize rebuild costs with complete chrome surface repair.
- Fully equipped with chroming, grinding, and polishing capabilities for hydraulic cylinder rods up to 22 feet in length and 24 inches in diameter.
- Meet all county and state environmental regulations.
- EPA compliant zero discharge facilities.

Machine and Welding Shops

- State-of-the-art equipment for hydraulic equipment repair and testing.
- 80,000 sq. ft. Tucson facility Shop preventive maintenance program assures tight tolerances for machining. Custom machining and metal fabrication.

COMPLETE COMPONENT REBUILD

The Best Experienced Technicians

We are the industry leader in rebuilding and repairing electric drive truck components for all makes. We have been overhauling and remanufacturing diesel engines since 1982.

Our talented staff includes team members with an average tenure of over 25 years in the industry.

Electrical Rotating Department (ERD)

- Repair and rebuild electric drive truck components for any brand, any model.
- Specialize in the complete overhaul of Komatsu, Terex & Liebherr truck electric wheel motors, alternators, grid blowers, and generators manufactured by G.E., Siemens, and Kato.

Engine Overhaul Department (EOD)

- New state-of-the-art positive air facility equipped with new tooling such as lathes and boring machines.
- Specialize in Komatsu, Cummins, Caterpillar and Detroit Diesel engine rebuilds.
- Each component is completely disassembled, cleaned and inspected using OEM re-usability criteria. All sub-assemblies (including turbochargers, water pump, fuel pump, etc.) are rebuilt or replaced.
- Components are tested on our Engine Dynamometer.

Transmission Department

- A 4-bay shop is fully equipped to re-manufacture, repair and test transmission, differentials, final drives and torque converters.
- Components are tested on our Transmission Dynamometer.
