TECO Westinghouse

Manufacturer of custom built motors to 30,000HP. Rogers stocks WPIL, medium voltage motors from 400 to 5000HP in 2, 4, 6, & 8 pole designs. We also stock TWMC's obsolete, TEFC, medium voltage, type AEHA motors from 150 to 800HP. TWMC also offers a complete line of VFD's.

General Electric has been a leading manufacture of electric motors and power conversion products since it's inception in 1879. AC, DC, Vertical, Horizontal, IEEE, API, Low, Medium, and High Voltage products, GE has it covered. Their medium voltage custom 8000 frames set the standard for quality and durability and helped build this country to where it is today! We have Energy Saver, XSD Ultra, and Quantum motors in stock, with plans to expand our inventory to include many custom 8000 ratings.

Manufacturer of low voltage electric motors up to 2500 HP and medium and high voltage up to 70,000 HP. WEG also manufactures Variable Frequency Drives, Soft Starters, Controls, Panels, Transformers, and Generators. WEG has excellent capabilities for custom machines including, Synchronous and Wound Rotor. WEG maintains a large inventory with manufacturing capabilities in both North and South America.

SIEMENS

Rogers Equipment has been a large distributor of Siemens motors for over 17 years. We can supply duplicate low and medium voltage motors as well as standard stock product.

Combined with ABB, Baldor can now claim to be the world's largest motor manufacturer with capacities exceeding 100,000HP. Currently investing in multiple motor manufacturing plants, some in the US, Baldor/ABB is dedicated to being a leader in all types of AC and DC motors.

We stock ODP, TEFC, and XP motors 444T frame and larger, and buy these motors in quantity in order to offer you the most competitive price possible. With short lead times and much flexibility, Marathon is a great option for competitively priced, custom built electric motors.

This leader in Variable Speed Drives builds AC Adjustable Frequency Drives from fractional to greater than 120,000 HP and DC Drives to over 20,000 HP. Their Active Front-end drives offered either as Ultra-Low Harmonic or Fully Regenerative in both Low "ACS800" and Medium "ACS2000" Voltage versions is driving another evolution in drive technology. We stock their LV ACS550 series AFDs to 200 HP and their MV ACS2000 series drives to 2000 HP.

TOSHIBA

Manufacturer of electric motors and adjustable speed drives to 50,000HP. Rogers Equipment is a "Premier Partner" with Toshiba, which allows us to offer extremely competitive pricing. We stock Toshiba low voltage motors up to 700HP, medium voltage up to 2250HP and also their T300MVi and MTX medium voltage adjustable speed drives.

Manufacturer of AC Induction motors to 700 HP. Large selection of NEMA frame motors with many stock locations throughout the country.

TATUNG

Manufacturer of Low & Medium Voltage Motors from 1 HP through 25,000 HP. AC SCI, AC SYN, Slip Ring and DC Units.

Other Brands Competitively Offered

Equipment Types Offered

Horizontal Motors • C-Face, D-Flange or P-Base • Vertical Hollow or Solid Shaft

Gear Motors • Brake Motors • Crusher Duty Motors • DC Motors • AC Variable Frequency Drives

DC Drives • Low and Medium Voltage Motor Control • Low and Medium Voltage Solid State Starters

Rogers Equipment Sales, Inc. Equipment Condition Definitions

NEW	Factory new product with full manufacturer's warranty/guarantee included.
NEW SURPLUS	Unused product not necessarily still under warranty by the manufacturer. This product is usually sold with a one year Rogers Equipment Sales, Inc. warranty; may also be offered "As-Is/E-Okay".
RECONDITIONED	Product has been reconditioned by a competent apparatus service provider and is offered with a warranty from either Rogers Equipment Sales or the equipment rebuilder directly. Warranty period can range from 90 days to one year or longer, everything's negotiable.
AS-IS/E-OKAY	Electrically Okay condition means the apparatus operates and complies with the stamped nameplate rating and has been or is capable of passing any or all tests noted in section 4.3 of "ANSI/EASA Standard AR100-1998: Recommended Practice". No warranty is given or implied as to the motor's mechanical condition. One should always assume the apparatus will need some level of servicing or overhauling. Client has a very short time to claim the motor is not "Electrically Okay".
